

Trend Pro Ankle 71

DCT-1971 The Trend PRO Ankle Brace is designed to support various ankle injuries with two adjustable levels of support. The taller section offers added stability for more acute injuries, while the lower section enhances mobility during active use, simply by detaching the taller part. Its low-profile design ensures a comfortable fit

Comfortable Design

Low-profile, fits easily inside shoes for all-day comfort.

Pro Ankle

Highlights

- Adjustable Support: Offers two levels of support. The taller section provides added stability for acute injuries, while the lower section enhances mobility for recovery and active use.
- Customizable Fit: Easily switch between support levels by detaching the taller section, allowing for tailored support to match activity or injury severity.

Indications

- Acute ankle injuries
- High ankle sprains
- Tibia/Fibula stabilization
- Chronic ankle instability

Versatile Use

Provides stability for recovery and flexibility for daily activities.

PDAC Approved: L1971
